The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-7 and 13-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamazaki ('048) in view of Satoh.

Yamazaki teaches all of the limitations of the claims except the chambers of the valves are not identically created by the diaphragm valve's structure. Satoh teaches a valve structure basically identical to the applicants' structure.

It would have been obvious to modify Yamazaki by using the valve structure of Satoh to open the vapor line because both valves operated in the same way to feed fuel vapor from the fuel tank to the canister.

Applicant's arguments filed April 23, 2005 have been fully considered but they are not persuasive.

In particular, an argument can be made for the fact that the inlet of the Yamazaki device is out of fuel vapor communication with the vapor headspace and there is no question about the fact that the outlet is positioned proximate the bottom of the fuel tank. Furthermore, Satoh teaches a refueling tube which is clearly out of communication with the vapor space at its inlet and in most cases within the liquid level of the fuel. Even the applicant's tube will not be below the liquid level at very low fuel levels. Thus, positioning the tube of Yamazaki out of communication with the vapor space would have been obvious in view of Satoh.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
